

314138 to 314771—Continued**314138. AEGILOPS sp. Gramineae.**

Col. No. 7. Dry hill slopes of Ulugbek Observatory. Low annual, to 6 inches high.

314139. AELUROPS LITTORALIS (Gouan) Parl. Gramineae.

Col. No. 31. Edge of clayey desert flat about 90 km. north of Galia-Aral. Rhizomatous grass, ascending culms to 10 inches high.

314140. AGROPYRON TRICHOPHORUM (Link) Richt. Gramineae.

Stiffhair wheatgrass.

Col. No. 18. Fertile swale 20 km. south of Galia-Aral. Rhizomatous perennial, culms to 24 inches high. Basal leaves clustered, decumbent.

314141. ASTRAGALUS FILICAULIS Fisch. & Mey. ex Ledeb. Leguminosae.

Col. No. 11. Edge of cultivated field 15 km. south of Samarkand near fruit research station. Annual, small, fine leaved, to 4 inches high. Usually with single fruiting head of 3 to 6 pods.

314142. ASTRAGALUS FILICAULIS Fisch. & Mey.

Col. No. 8. Dry hill slopes near Ulugbek Observatory. Annual, small, fine leaved, to 4 inches high. Usually with single fruiting head of 3 to 6 pods.

314143. ASTRAGALUS sp.

Col. No. 24. Seven km. east of Samarkand, near Ulugbek Observatory on very dry hills. Low annual, to 6 inches high with 1 to 4 pods.

314144. BROMUS SEVERTZOVII Regel. Gramineae.

Col. No. 28. Seven km. east of Samarkand, near Ulugbek Observatory on dry slopes. Low annual, to 6 inches high under dry conditions; to 18 inches high with favorable moisture.

314145. CARAGANA sp. Leguminosae.

Col. No. 19. Galia-Aral. Shelter belt near Arid Crops Research Center headquarters. Dense bush to 7 feet high; branches wandlike; racemes long.

314146. CAREX PACHYSTYLIS Gay Cyperaceae.

Col. No. 10. Near Fruit Research Station 15 km. south of Samarkand. Low perennial, to 6 inches high; single culm and usually a single spikelet. Basal cluster of 3 leaves.

314147. CAREX sp.

Col. No. 9. Dry hill slopes near Ulugbek Observatory. Low perennial, to 6 inches high; single culm and usually a single spikelet. Basal cluster of 3 leaves.

314148. CITRULLUS LANATUS (Thunb.) Mansf. Cucurbitaceae.

Watermelon.

Col. No. 3. 'Mozaic'. Market in Samarkand. Locally grown. Dark and light green striped fruit; elongate.

314149 and 314150. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.

314149. Col No. 2. 'Gulabi'. Market in Samarkand. Locally grown. Flesh thick, sweet, aromatic.

314150. Col. No. 4. 'Ak-Navat'. Market in Samarkand. Locally grown. Fruit smaller than 'Gulabi'.

314151. ERODIUM CICUTARIUM (L.) L'Herit. Geraniaceae. Alfileria.

Col. No. 27. Seven km. east of Samarkand, near Ulugbek Observatory on dry slopes. Small annual to 4 inches high with 2 to 8 fruits.
